The International Research Conference Aims and Objectives

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations. With its high quality, it provides an exceptional value for students, academics and industry researchers.

ICGNRFC 2021: 15. International Conference on Geriatric Nursing, Risk Factors and Complications aims to bring together leading academic scientists, researchers and research scholars to exchange and share their experiences and research results on all aspects of Geriatric Nursing, Risk Factors and Complications. It also provides a premier interdisciplinary platform for researchers, practitioners and educators to present and discuss the most recent innovations, trends, and concerns as well as practical challenges encountered and solutions adopted in the fields of Geriatric Nursing, Risk Factors and Complications

Call for Contributions

Prospective authors are kindly encouraged to contribute to and help shape the conference through submissions of their research abstracts, papers and e-posters. Also, high quality research contributions describing original and unpublished results of conceptual, constructive,

empirical, experimental, or theoretical work in all areas of Geriatric Nursing, Risk Factors and Complications are cordially invited for presentation at the conference. The conference solicits contributions of abstracts, papers and e-posters that address themes and topics of the conference, including figures, tables and references of novel research materials.
